Data report

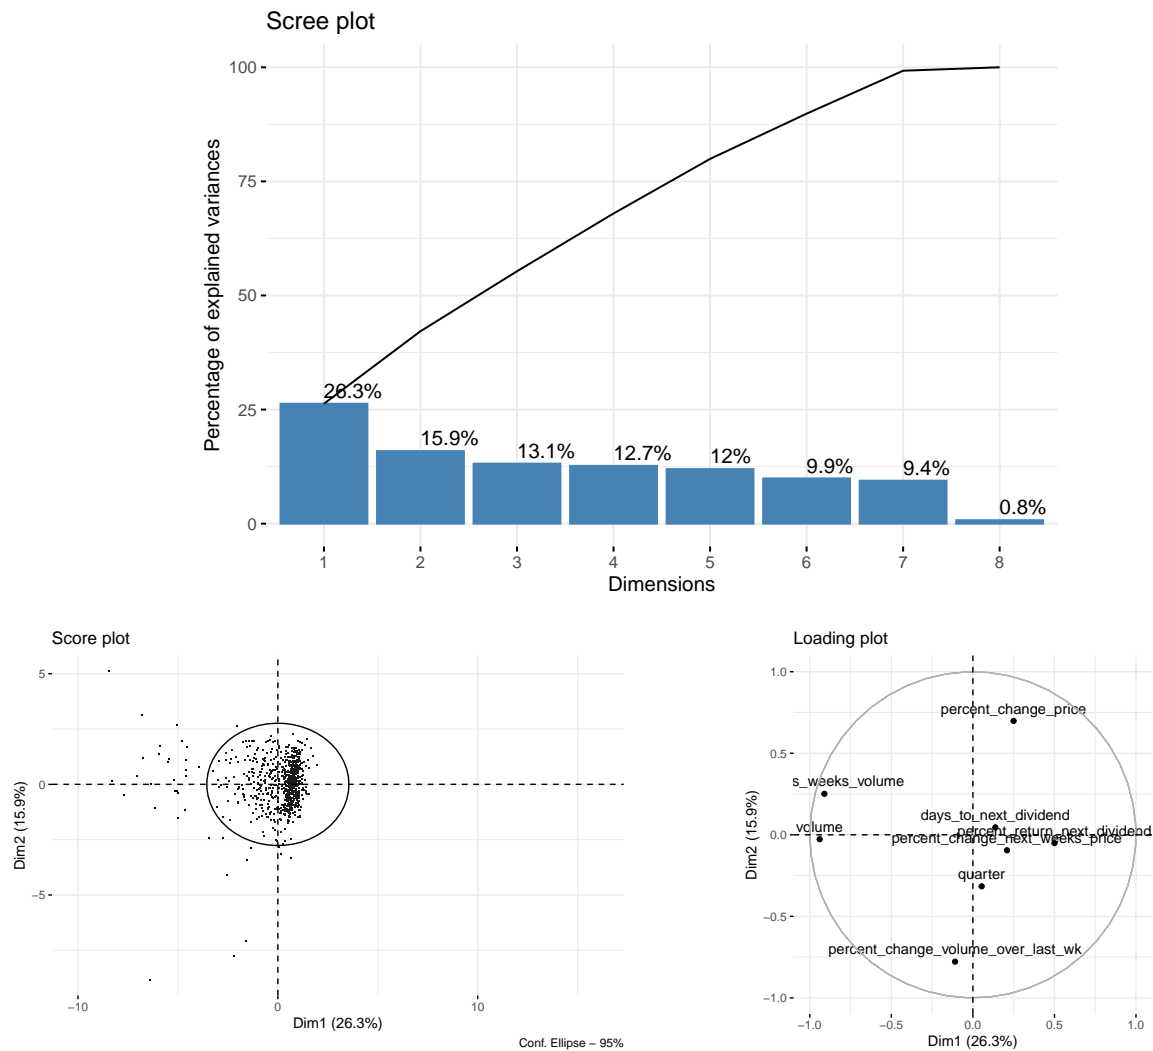

MHEALTH

The MHEALTH (Mobile Health) dataset is devised to benchmark techniques dealing with human behavior analysis based on multimodal body sensing. It contains 24 numeric variables, and has 35174 complete observations.

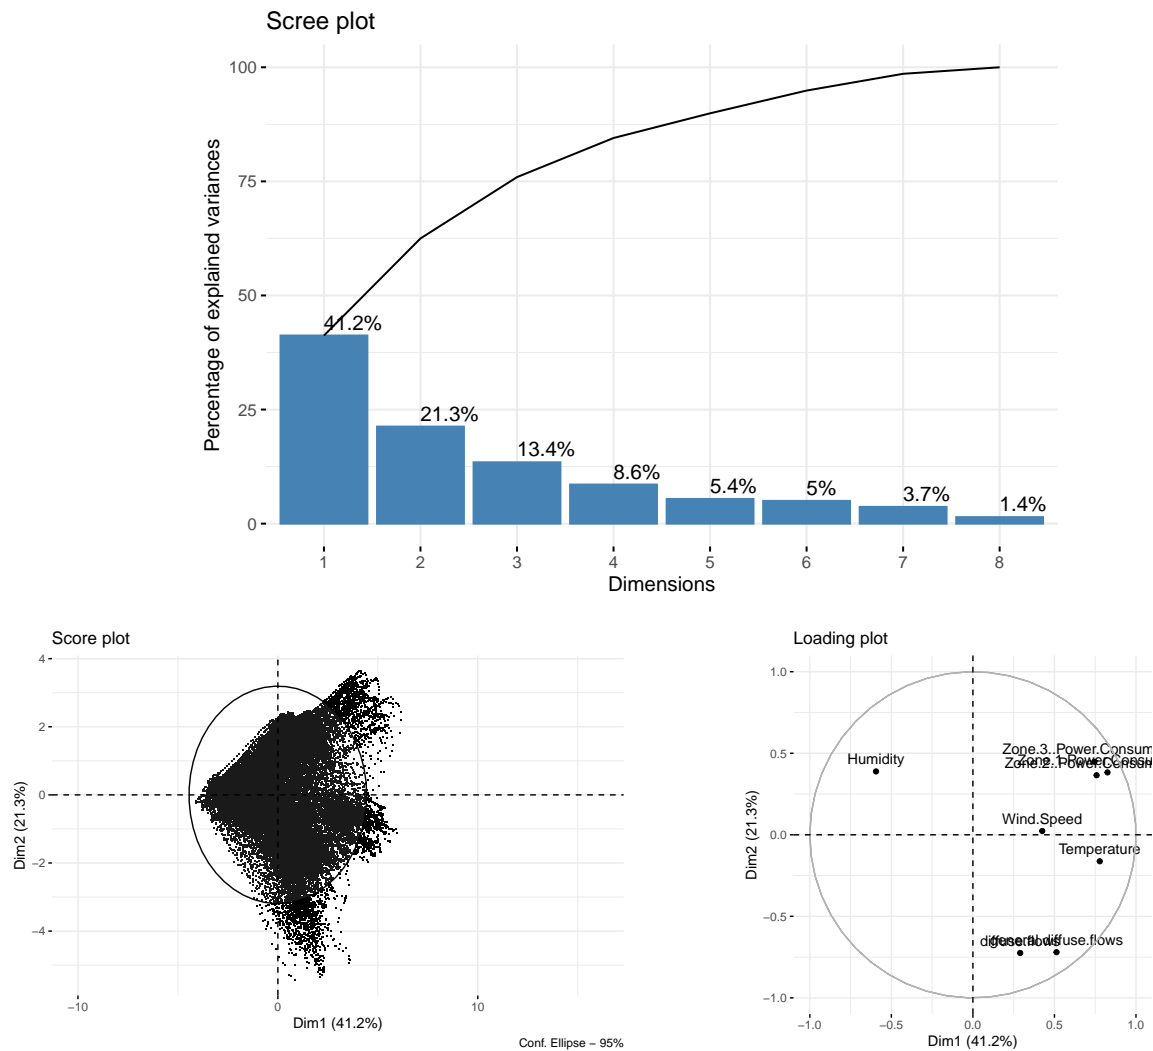

Dow Jones dataset

This dataset contains weekly data for the Dow Jones Industrial Index. It contains 8 numeric variables, and has 720 complete observations.

City power consumption

This dataset is related to power consumption of three different distribution networks of Tetouan city which is located in north Morocco. It contains 8 numeric variables, and has 52416 complete observations.

Metro Interstate Traffic Volume

This dataset describes hourly Minneapolis-St Paul, MN traffic volume for westbound I-94. *Note:* this dataset contains information on weather events and so could give a natural subset of observations (e.g. only want to examine traffic volume when it is raining). This dataset contains 5 numeric variables, and has 48204 complete observations.
